Description:

Make your warehouse a safe workplace by having these Smart Racking Sensor Light installed at corner of rackings. 9 meters detection range, light will turn red and horn will beep when it detects on-coming traffic from both sides to avoid possible collision.

Product Features

- Protects pedestrian and forklift drivers
- Avoids possible collision
- Easy installation, super strong magnets adhere to corner of metal racking
- Green light - when there is traffic on one side only, no horn beep
- Red light - when there is traffic approaching on both sides, horn beeps
- Horn beeps at 70 - 90 decibels, can be easily heard even in noisy warehouse environment
- Batteries can be easily replaced
