# BIKE RACKS

## Bike Rack - Galvanised Surface Mount Hoop

Galvanised Surface Mount Hoop Bike Rack. Secures bikes of all sizes and is easily installed.

### Specifications:

SKU: BHOOPGALSM

Width: 800mm

Height: 910mm

Material: Hot dipped galvanised steel

## Bike Rack - Stainless Steel Hoop Surface Mount

Made from 304 Grade Stainless Steel our Hoop Bike Rack looks impressive.

### Specifications:

SKU: BHOOPSSSM

Material: Stainless steel round tube 304 grade 50.8 x 1.6mm

Width: 950mm centre to centre

Height: 900mm

Surface mount plates: 7mm thick with 3 mounting holes

## Bike Rack - Stainless Steel Hoop In-Ground

Perfect for bike storage in places where staff commute to work by bicycle.

### Specifications:

SKU: BHOOPSSIG

Material: 304 Grade Stainless Steel

46Mm Outer Diameter

Width: 860mm

Height: 1240mm

Anchor rods included for installing into new concrete.

## Wall Mount Bike Rack

Most effective method for multiple bike storage in areas short on space. Suitable for indoor or outdoor use. One bike can be hung vertically per bike rack.

### Specifications:

SKU: WMBIKERACK

Height: 700mm

Depth: 600mm

Width: 125mm

Material: Galvanised steel

Finish: Powder coated Black

# BOLLARDS

## Surface Mount - 90mm Xpress

The black plastic non-corrosive cap provides a refined finish to the bollard. Fast, strong, economical and good looking.

### Specifications:

**SKU: BOLSM90X**  
Height: 1000mm  
Bollard Material: Galvanised steel  
Thickness: 3mm steel wall  
Diameter: 90mm OD  
Finish: Yellow powder coating, C1 red ref band  
Fixings: 4 Included

## Surface Mount - 90mm

Our 90mm surface mount bollards are ideal for pedestrian separation and zoning off areas. Made of galvanised steel with a welded steel cap and 4 hole base plate.

### Specifications:

**SKU: BOLSM90**  
Height: 900mm  
Bollard Material: Galvanised steel  
Thickness: 3mm steel wall  
Diameter: 90mm OD  
Finish: Yellow powder coating, C1 red ref band  
Fixings: 4 Included

## Surface Mount - 140mm

The 140mm Surface Mount Bollard is one to consider for your asset protection needs. Assess the risks and threats, determine the areas requiring protection and order these to fit. These imposing bollards restrict vehicle access whilst allowing clear pedestrian flow.

### Specifications:

**SKU: BOLSM140**  
Height: 1300mm  
Bollard Material: Galvanised steel  
Thickness: 3mm steel wall  
Diameter: 140mm OD  
Finish: Yellow powder coating, C1 red ref band  
Fixings: 4 Included

## Surface Mount - 165mm

Security guards are really expensive to have on hand 24/7 so we have the next best thing! Our 165mm Surface Mount Bollard is a heavy duty protection bollard useful in areas where ram raids could be likely or where vehicles are travelling at varying speeds in the vicinity of buildings or other assets.

### Specifications:

**SKU: BOLSM165**  
Bollard Material: Galvanised steel  
Height: 1000mm  
Thickness: 5mm steel wall  
Diameter: 165mm OD  
Finish: Yellow powder coating, C1 red ref band  
Fixings: 4 Included

## Surface Mount - LED Solar Light 90mm Stainless Steel

Our LED Solar rechargeable 90mm Stainless Steel Bollards are designed to impress as well as providing security and protection. Ideal for providing visual guidance and illuminating walkways and paths at night, the bollard will enhance any shopping centre, car park and building entrance while meeting architectural requirements.

### Specifications:

**SKU: BOLSM90SSLED**  
Bollard Material: Stainless Steel 304 Grade  
Height: 1000mm  
Diameter: 90mm OD  
Lights: 4 x LED 0.2W  
Fixings: 4 Included

## Surface Mount - 90mm Stainless Steel 316 Grade

Our 90mm Stainless Steel Bollards don't compromise on style or strength. When durability is considered important you can't go past Marine Grade Stainless Steel as an option for your bollards. Marine Grade Stainless Steel offers a high level of corrosion resistance so they are also perfect for beachside locations.

### Specifications:

**SKU: BOLSM90SS**  
Material: 316 Marine Grade Stainless Steel  
Height: 900mm  
Diameter: 90mm OD  
Fixings: 4 Included

### Surface Mount - 168mm Stainless Steel 316 Grade

Our 168mm Stainless Steel Bollards are designed to impress as well as providing security and protection. Manufactured from 316 Marine Grade Stainless Steel with a polished finish, these bollards are imposing and attractive.

#### Specifications:

**SKU: BOLSM168SS**

Height: 1200mm

Material: 316 Marine Grade Stainless Steel

Diameter: 168mm OD

Fixings: 4 Included

### Surface Mount or Below Ground - Billboard Bollard

Showcase your brand with the Safety Xpress Billboard Bollard. Standing 1300mm high and 140mm in diameter the Billboard Bollard not only provides protection but also brand exposure. Simply send us your company logo or custom message and we will do the rest. Available in a range of colours.

#### Specifications:

**SKU: BILBOL140SM**

Height: 1300mm

Material: Galvanised steel

Thickness: 3mm steel wall

Diameter: 140mm OD

Fixings: 4 Included

### In-Ground - 90mm Galvanised

Due to popular demand we have a galvanised in-ground bollard available that is competitively priced, can be filled with concrete for extra strength and is 1300mm tall. The extra height gives better visibility and the class 1 reflective red band acts as a warning even in dimly lit areas.

#### Specifications:

**SKU: BOLBG90GAL**

Material: Galvanised steel

Finish: Class 1 Red Reflective Band

Height: 1300mm (1000mm above ground and 300mm below ground)

Diameter: 90mm OD

### In-Ground - 90mm

Install this 90mm Below Ground bollard where you need safety and security and get the job done properly. Galvanised then powder coated safety yellow and complete with welded anchor bars. Fillable with concrete for added strength.

#### Specifications:

**SKU: BOLBG90**

Material: Galvanised steel

Finish: Yellow powder coating, C1 red ref band

Height: 1200mm (900mm above ground and 300mm below ground)

Diameter: 90mm OD

Wall thickness: 3mm

### In-Ground - 114mm

The 114mm Below Ground Bollard is manufactured for strength and long term protection of your assets. Suitable for being installed into asphalt or pliable surfaces where a concrete footing is required. It also has a removable cap so its overall functionality can be strengthened by being filled with concrete.

#### Specifications:

**SKU: BOLBG114**

Material: Galvanised steel

Finish: Yellow powder coating, C1 red ref band

Height: 1300mm (1000mm above ground and 300mm below ground)

Diameter: 114mm OD

Wall thickness: 5mm

### In-Ground - 140mm

The Safety Xpress Below Ground 140mm Bollard is ideal for installation in areas where assets require protection and bollard strength is important. This bollard comes with a loose cap so the bollard can be filled with concrete for extra strength for maximum protection.

#### Specifications:

**SKU: BOLBG140**

Material: Galvanised steel

Finish: Yellow powder coating, C1 red ref band

Height: 1600mm (1300mm above ground and 300mm below ground)

Diameter: 114mm OD

Wall thickness: 5mm

### In-Ground - Stainless Steel 90mm Bevelled Top

With its clean lines and angles you'll be impressed with this bollard. Stainless steel is known for its high level of corrosion resistance while offering an architectural look and feel. Used in areas such as car yards and shopping centres.

#### Specifications:

**SKU: BOLBG90SSB**

Material: 304 Grade Stainless Steel

Finish: Brushed Stainless Steel

Height: 1200mm (900mm above ground and 300mm below ground)

Diameter: 90mm OD

Wall thickness: 3mm

### In-Ground - Stainless Steel 140mm Bevelled Top

This larger 140mm sized bollard is imposing and impressive. Used for asset protection in areas such as the front of corporate buildings for a classy finish. The bevelled top adds an edge of difference.

#### Specifications:

**SKU: BOLBG140SSB**

Material: 304 Grade Stainless Steel

Finish: Brushed Stainless Steel

Height: 1200mm (900mm above ground and 300mm below ground)

Diameter: 90mm OD

Wall thickness: 3mm

### Removable - 90mm Sleeve Lock Stainless Steel

For a sleek, stylish and contemporary look consider this bollard as your solution. The bollard locks into place when in use and is easily removed for full access when needed.

#### Specifications:

**SKU: REMBOL90SS**

Material: 316 Grade Stainless Steel

Height: 900mm

Diameter: 90mm OD

Wall thickness: 3mm

### Removable - 90mm Sleeve Lock

These bollards slide into a sleeve, core drilled into the surface (concrete or bitumen) or set in new concrete. The bollard is locked into the sleeve via a padlock to keep vehicles out, and then when you need access it's easy to unlock and take the bollard out.

#### Specifications:

**SKU: BOLRSL90M**

Material: Galvanised steel

Finish: Yellow powder coating, C1 red ref band

Height: 1000mm above ground

Diameter: 90mm OD

Wall thickness: 5mm

### Removable - 90mm Sleeve Lock Black

This bollard looks refined with its black powder coated finish and a red reflective band for extra visibility. A padlock locks it into the in-ground sleeve and is easily removed when you need access.

#### Specifications:

**SKU: BOLRSLB90M**

Material: Galvanised steel

Finish: Black powder coating, C1 red ref band

Height: 1000mm above ground

Diameter: 90mm OD

Wall thickness: 5mm

### Removable - 140mm Sleeve Lock

These purpose built bollards are used as a deterrent to thieves and to generally stop vehicle access into restricted areas when required. They can be core-drilled into existing surfaces or set in new concrete.

#### Specifications:

**SKU: BOLRSL140M**

Material: Galvanised steel

Finish: Yellow powder coating, C1 red ref band

Height: 1200mm above ground

Diameter: 140mm OD

Wall thickness: 5mm

### Removable - 90mm Roller Door Sleeve Lock

The Roller Door 90mm Bollard is installed inside warehouse roller doors to provide security against ram raids and also to keep thieves from forcing the roller door up.

#### Specifications:

**SKU: BOLRSLROL90**  
Material: Galvanised steel  
Finish: Yellow powder coating, C1 red ref band  
Height: 1000mm above ground  
Diameter: 90mm OD  
Wall thickness: 5mm

### Removable - 90mm Key Lock

This bollard slides into an in-ground sleeve, core drilled into the surface (concrete or bitumen) or set in new concrete. It is locked into the sleeve using a key to keep vehicles out. When you need access it's easy to unlock the removable bollard and take the bollard out.

#### Specifications:

**SKU: BOLRKL90**  
Material: Galvanised steel  
Finish: Yellow powder coating, C1 red ref band  
Height: 1000mm above ground  
Diameter: 90mm OD  
Wall thickness: 3mm  
2 x keys supplied (keyed alike)

### Removable - 140mm Key Lock

This heavy duty bollard is easily unlocked at the top of the bollard using the included keys and removed via the handle on top. Once the bollard is removed, the hole is covered by the sleeve lid to create a flat surface on the ground.

#### Specifications:

**SKU: BOLRKL140**  
Material: Galvanised steel  
Finish: Yellow powder coating, C1 red ref band  
Height: 1200mm above ground  
Diameter: 140mm OD  
Wall thickness: 3mm  
2 x keys supplied (keyed alike)

### Removable - 90mm Key Lock Stainless Steel

A high-security locking system protects your assets and yet allows you to easily remove the bollard with a key. The stainless steel finish is suitable for all weather and areas whilst maintaining a stylish finish.

#### Specifications:

**SKU: BOLRKL90SS**  
Material: 304 Grade Stainless Steel  
Height: 1000mm above ground  
Diameter: 90mm OD  
Wall thickness: 3mm  
2 x Keys supplied (bollards keyed alike)

### Removable - Surface Mount

Our surface mount removable bollard is made of heavy duty steel and is designed to lock into a surface mount receiver. With four fixing points, they are very easily installed with no core drilling required.

#### Specifications:

**SKU: REMBOLSMKA**  
Material: Galvanised steel  
Finish: Yellow powder coating, C1 red ref band  
Height: 1000mm above ground  
Diameter: 90mm OD  
Wall thickness: 5mm  
2 x Keys inc. (bollards keyed alike or unique)  
1 x Receiver shoe inc.

### Bollard Storage Sleeves

**140mm Storage Sleeve SKU: BOLSTOR140S**  
Suitable for storing the Safety Xpress 140mm Key Lock and 140mm Sleeve Lock Removable Bollards.

**90mm Storage Sleeve SKU: BOLSTOR90S**  
Suitable for storing the Safety Xpress 90mm Key Lock and 90mm Sleeve Lock Removable Bollards.

**90mm Double Storage Sleeve SKU: BOLSTOR90D**  
Suitable for storing two of the Safety Xpress 90mm Key Lock or 90mm Sleeve Lock Removable Bollards.

## Bollard Hangers

### 140mm Bollard Hangers

Single - SKU: BOLHANG140S

Double - SKU: BHANG140D

Single and Double Bollard Hangers suitable for hanging the Safety Xpress 140mm Key Lock and Sleeve Lock removable bollards.

### 90mm Bollard Hangers

Single - SKU: BOLHANG90S

Double - SKU: BOLHANG90D

Single and Double Bollard Hangers suitable for hanging the Safety Xpress 90mm Key Lock and Sleeve Lock Removable Bollards.

## Remote Control Parking Lock

This bollard is discreet but more than able to do its job! Imagine always having your parking spot available and not having to get out of your car to make it work. Perfect for inclement weather. Easily installed using 4 x D size batteries, no electrician required.

### Specifications:

SKU: RCPARKLOCK

Height when down: 75mm

Height when raised: 390mm

Size: 450mm x 450mm x 80mm

Remote Control range: 15 metres

2 x Remote Controls included.

Security alarm. Mounting bolts included.

## Parking Protector Padlock Bollard

The Fold Down Parking Protector Padlock Bollard is secured with a padlock at the base and is a great option when unique keys are required for multiple units installed in the same location.

### Specifications:

SKU: FDPLBOL

Material: Galvanised steel

Finish: Yellow powder coating, C1 red ref band

Height: 755mm when upright

Clearance Height: 90mm when folded down

Diameter: 70mm

Fixings: 4 included

## Fold Down Bollard / Parking Space Protector 90mm

When you're sick of people parking in your parking spot, it's time to act! Sturdy and highly visible with its class 1 red reflective band, this bollard stands out even in under-cover areas where lighting can be dim.

### Specifications:

SKU: FDBOLLARD

Height (upright): 750mm (folded): 125mm

Material: Galvanised steel

Finish: Yellow powder coating, C1 red ref band

Clearance: 90mm when folded down

Diameter: 90mm

Fixings: 4 included, 2 keys included

## Parking Bollard - 620mm high

This bollard will stop any carpark nuisance attempting to park in your spot. This bollard folds down to give you and your vehicle access and then sits bolt upright and locks into place with a key to protect your space.

### Specifications:

SKU: PBOL620

Height (upright): 620mm

Height (folded down): 100mm

Diameter: 63mm

Material: Galvanised steel

Finish: Yellow powder coating

Fixings: 4 included, 2 keys included

## Bollard - Protector Covers

Protect your new bollards or revitalise your old bollards.

Easy to slide over the top of existing bollards and suitable for adding extra height to shorter bollards to assist with visibility.

### Specifications:

100Mm Bollard Protector Cover

SKU: BOLCOV100

Height: 1320mm (can be cut to size)

Inside Diameter: 100mm

152Mm Bollard Protector Cover

SKU: BOLCOV152

Height: 1320mm (can be cut to size)

Inside Diameter: 152mm

### Super Flexi Bollard

The Safety Xpress Super Flexi Bollard is used for traffic delineation creating a guide whilst reducing the risk of any damage occurring to the vehicle.

Built from polyurethane the Super Flexi Bollard will rebound to an upright vertical position if a car knocks or drives over it. Secured in place by installing 3 fixings (supplied) per bollard.

#### Specifications:

**SKU: BOLS75**

Diameter: 75mm

Height: 750mm

Material: High Vis Polyurethane, UV stabilised

Fixings: 3 included

### Knock Down Bollard - 2 Piece

Made from plastic (polyethylene), the flexible knock down bollards are a lightweight and easy to install bollard easily removed from the base when access is required by using the twist-lock system. Their flexible design allow the bollard to take a good knock in all directions without causing damage to vehicles.

#### Specifications:

**SKU: FKD2PB**

Diameter: 100mm

Height: 1000mm

Material: High Vis orange plastic

Fixings: 4 included

### T-Top Bollard - With 6kg base

It's the most popular fella on the road these days. The T-Top Bollard is made from Hi-Vis orange PVC with a reflective band around it, this very useful and versatile bollard is called the "T" Top. Why the "T" Top you might ask? Well the top is in the shape of a T which makes it easy to grip, and makes it simple to wrap barrier tape between bollards. It doesn't weigh much and they stack well too.

#### Specifications:

**SKU: TTOPBASE**

Height: 1150mm

Base: 6.5kg

### Hoop Top Bollard

The "Hoop Top" has a distinctive hoop which makes it easy to hang in your vehicle and easy to transport to and from work sites. Also, you can thread barrier tape between bollards (no need to wind around each top). This allows the tape to move through the bollards on windy days so they're not as prone to falling over.

#### Specifications:

**SKU: HOOPTOP**

Height: 1150mm

Base: 6.5kg

### Impact Bollard - 90cm High

Unique and exclusive to Safety Xpress, the Impact Bollard is manufactured from high grade TPU and is designed to flex on impact. Tested to withstand over 1000 impacts and 20 Tonne at 100kmh, our Impact Bollard can be knocked or driven over by almost any vehicle and will spring back to its original upright position without any crease or cracks.

#### Specifications:

**SKU: BOLCIT90**

Material: Durable Thermoplastic Polyurethane

Height: 900mm

Diameter: 100mm

Colour: Yellow with class 1 reflective band

Fixings: 4 Included

### Impact Bollard - Shared Zone 1350mm High

The Surface Mount Shared Zone Impact Bollard has many applications but is specifically designed for installation in shared zones in between disabled car parking spaces. The bollards flexibility reduces damage to vehicles when navigating parking areas. The Shared Zone Impact Bollard complies with car parking regulations and has a 20 Tonne impact rating.

#### Specifications:

**SKU: BOLCIT130**

Material: Durable Thermoplastic Polyurethane

Height: 1350mm

Diameter: 100mm

Colour: Yellow with class 1 reflective band

Fixings: 4 Included

# TACTILE INDICATORS

## Reinforced Fibreglass Directional Tactile 300 x 600

This tactile has been cleverly designed using an ultra UV stabilised resin and is reinforced with embedded fibreglass, resulting in a super strong product that will be durable in even the heaviest pedestrian traffic areas. Installed using raw plugs and screws (supplied) and glue available separately.

### Specifications:

**SKU: RFTACD600**

Material: UV Stabilised Reinforced Fibreglass  
Size: 300mm x 600mm x 2mm  
Available colours: Black, White, Yellow & Blue  
Fixings supplied  
Manufactured to AS/NZS 1428.4.1:2009

## Reinforced Fibreglass Hazard Tactile 300 x 600

Engineered to successfully upgrade any existing surface to comply with AS/NZS 1428.4.1:2009 mandated detectable warning requirements. Perfect for both the retrofitting of existing sites and new infrastructure. Used to alert the visually impaired of environment changes.

### Specifications:

**SKU: RFTAC600**

Material: UV Stabilised Reinforced Fibreglass  
Size: 300mm x 600mm x 2mm  
Available colours: Black, White, Yellow & Blue  
Fixings supplied  
Manufactured to AS/NZS 1428.4.1:2009

## Tactile Indicator Single Studs - TGSI 25mm shaft

The Safety Xpress Single Tactile Stud is made from a high grade polyurethane with increased strength and is UV stabilised so they won't fade over time in the sun. Single stud tactiles are ideal for use in smaller areas or where the surface presents a curve making tactile plates a hazard to use. Installed by drilling the surface with an 8mm drill bit.

### Specifications:

**SKU: TGSIP25**

Material: High Grade UV Stabilised Polyurethane  
Shaft: 25mm  
Colour: Yellow, Black, White, Red, Grey, Beige, Blue  
Installed using an 8mm Drill bit, no glue required

## Tactile Indicator 'Peel & Stick' - TGSI Directional Tile

Peel off the backing from the Safety Xpress Peel and Stick Polyurethane Tactile and you're ready to stick the tactile tile directly onto the surface. No need for glue, the sticky back is very aggressive to most surfaces so get it right the first time when you install them because they won't be easy to move.

### Specifications:

**SKU: TGSIDPS**

Material: High Grade UV Stabilised Polyurethane  
Size: 300mm x 300mm  
Available colours: Black, White, Yellow, Grey, Beige, Blue and Red  
Manufactured to AS/NZS 1428.4.1:2009

## Tactile Indicator 'Peel & Stick' - TGSI hazard tile

A great "Do It Yourself" option with no need for mixing messy epoxy resins. These tiles are supplied as standard with a convenient, aggressive adhesive backing. Suitable for a variety of indoor and outdoor surfaces and available in a range of colours. Notifies visually impaired people of hazards ahead, and approaching intersections.

### Specifications:

**SKU: TGSIHPS**

Material: High Grade UV Stabilised Polyurethane  
Size: 300mm x 300mm  
Available colours: Black, White, Yellow, Grey, Beige, Blue and Red  
Manufactured to AS/NZS 1428.4.1:2009

## Tactile Indicator Studs - Polyurethane Bladed Shaft

Joined together and spaced like well-trained soldiers, these hazard warning tactiles (to Australian Standard) have bladed shafts to install with ease. Use a concrete saw to cut a groove and slide the tactiles blade base in for a tight fit. Pretty simple and you're done. The bladed stud tactile is suitable for use indoors and outdoors, for commercial car parks, footpaths and shopping centres.

### Specifications:

**SKU: STUDBPS**

Material: High Grade UV Stabilised Polyurethane  
Shaft: 14mm

### Tactile Indicator Single Studs - TGSI Stainless Steel Concentric

The Safety Xpress TGSI hazard warning stainless steel single stud tactile is suitable for indoor or outdoor use and complies with Australian Standards. Designed for easy installation using the pressure fit system and an 8mm drill bit. A flat conical edge presents an eye catching contrast to the concentric surface across the expanse of installed tactiles. A very refined look.

#### Specifications:

**SKU: STUDSSCO**

Material: Stainless Steel

Shaft: 14mm - Pressure fit system, install using 8mm drill bit (no glue required)

### Tactile Indicator Single Studs - TGSI Stainless Steel with Ribbed Shoulders

Warning indicators need to do their job under all conditions and for all pedestrians. This Stainless Steel Tactile with Ribbed Shoulders will provide the solution in both indoor and outdoor environments. The ribbed shoulders may provide extra traction for vision impaired users of implements such as walking sticks and support canes.

#### Specifications:

**SKU: STUDSSR**

Material: Stainless Steel

Shaft: 14mm - Pressure fit system, install using 8mm drill bit (no glue required)

### Tactile Indicator Single Studs - TGSI Stainless Steel with Carborundum Insert

Individual Stainless Steel Tactiles with a carborundum insert provides extra grip in all weather conditions. The carborundum sits flush with the smooth collar edge of the tactile ensuring a hard, grippy surface with a smooth refined finish and a degree of illumination. The best of both worlds! Use an 8mm drill bit and your tactiles are easily and quickly installed.

#### Specifications:

**SKU: STUDSSCA**

Material: Stainless Steel

Shaft: 14mm - Pressure fit system, install using 8mm drill bit (no glue required)

### Tactile Indicator Single Studs - TGSI Stainless Steel with Poly Insert

Tactile Indicators are a support for the visually impaired. In the digital world that we live in they have also become a useful tool to warn walking users of devices that their environment is also about to alter and to alert them to roadways, steps and changes in pathway levels etc.

#### Specifications:

**SKU: STUDSSSP**

Material: Stainless Steel

Shaft: 14mm - Pressure fit system, install using 8mm drill bit (no glue required)

### 316 Stainless Steel Tactile Plate with Carborundum Insert

The most stylish tactile in our range. The Stainless Steel Tactile Plate with Carborundum Inserts not only looks great but it is also hard wearing and designed to last. Manufactured from polished 316 Marine Grade Stainless Steel these tactile plates are easy to install with just 4 fixing points per 300 x 300 tile.

#### Specifications:

**SKU: TACSSPCAR3**

Material: 316 Marine Grade Stainless Steel  
Size: 300mm x 300mm  
Fixings: 4 included per tile  
Manufactured to AS/NZS 1428.4.1:2009

### 316 Stainless Steel Tactile Plate Classic

Just take a look at these! The Stainless Steel Tactile Plates give a distinguished and uniformed look without all the extra work of single stud applications. Ready to take on the hardest of traffic areas and manufactured from 316 Marine Grade Stainless Steel, these tactiles will keep their good looks even at beachside locations. Add an upmarket look today and wait for the whistles!

#### Specifications:

**SKU: TACSSPCLA3**

Material: 316 Marine Grade Stainless Steel  
Size: 300mm x 300mm  
Fixings: 4 included per tile  
Manufactured to AS/NZS 1428.4.1:2009

### Tactile Indicator Single Studs - TGSI 25mm shaft

The SBD34 Skateboard Deterrents are manufactured from 316 Marine Grade Stainless Steel and will blend in with most architectural designs whilst doing their job to prevent damage caused by skateboard, inline skaters and bmx grinding.

#### Specifications:

**SKU: SBD34**

Material: 316 Marine Grade Stainless Steel  
Diameter: 34mm  
Height: 5mm  
Shaft: 20mm x 5mm  
Suggested spacing: 500mm - 700mm (maximum) with 150mm from ends & approx 30mm in from edge.

### Tactile Indicator Single Stud Template 1200 x 600mm

Used for installing individual tactile studs. The template makes the job even easier by guiding you so that you can keep the tactiles spaced at the regulation distance apart, and in clearly defined lines. Chuck away your tape measure and builders chalk and grab one of these instead!

#### Specifications:

**SKU: TSTUDSTEN**

Material: Hard wearing plastic  
Size: 1200mm x 600mm

### Surface Primer - Adhesive

Polyurethane adhesive used in conjunction with the Peel and Stick Tactile. Recommended for use when installing tactiles to porous surfaces such as trowled concrete.

#### Specifications:

**SKU: SPRIME700**

Size: 700g  
1 Tube will prepare surface for 8 tiles (300x300)

# STAIR NOSINGS

## Anti-Slip Tape - 10m Roll

Reduce risk of slips, trips and falls in and around the workplace with this anti-slip tape 50mm wide x 10m long. A coarse surface ensures maximum grip even in heavy traffic and wet or greasy conditions. Achieve maximum anti-slip protection whilst warning of dangerous areas.

Can be used throughout all areas of your facility on stairs, ramps, steps, entrances and exits.

### Specifications:

**SKU: ASLIP10B**  
Colour: Black  
Length: 10 Metres  
Width: 50mm

## Anti-Slip Tape - 10m Roll

This easily applied tape offers high visibility and a convenient solution to prevent falls, slips and accidents. Perfect for when the edge of steps seem to visually disappear into each other by creating a definition to each edge. It is easily installed and you can simply cut to your required lengths. Provide protection at your workplace or your home with our non-slip tape in safety yellow.

### Specifications:

**SKU: ASLIP10Y**  
Colour: Yellow  
Length: 10 metres  
Width: 50mm

## Anti-Slip Tape - 10m Roll

Utilising the peel and stick technology, this hazard tape is a highly durable solution to your safety requirements. Complete with a strong adhesive to stay put under testing conditions, the striped pattern screams, "Hazard – Watch Out!" Perfect for use in the workplace on ladders and where employees are working at height. An easily identifiable pattern that is an industry standard.

### Specifications:

**SKU: ASLIP10YB**  
Colour: Yellow/Black  
Length: 10 metres  
Width: 50mm

## Aluminium - Rubber Insert 10mm Compliant Bullnose

This stair nosing has a 10mm Bull Nose face and a rubber insert. Available in 3 colours – Black, Yellow and Grey. Recommended for general indoor & outdoor environments in low to medium traffic areas. Can be installed with glue or fixed in place using screws onto a variety of substrates including timber, concrete, bitumen, tiles, and vinyl rubber.

### Specifications:

**SKU: RUB7510**  
Length: Cut to size  
Size: 75mm x 10mm  
Insert Colour: Yellow, Black or Grey  
Australian Compliant - Manufactured to AS/NZS 1428.1

## Aluminium - Rubber Insert 30mm Face

Our aluminium stair nosings are manufactured from non-corrosive, high quality anodised aluminium. They provide a fast, permanent anti-slip surface to the front edge of all types of stair surfaces. The insert is available in Black, Yellow and Grey and creates a streamlined finish to add a refined look to any set of stairs.

### Specifications:

**SKU: RUB7530**  
Length: Cut to size  
Size: 75mm x 30mm  
Insert Colour: Yellow, Black or Grey  
Australian Compliant - Manufactured to AS/NZS 1428.1

## Aluminium - Tough Anti Slip 10mm Bullnose

Able to manage the harshest of conditions and ideal for heavy traffic areas. This 3mm thick carborundum insert is an all-weather grip packaged in an attractive stair nosing. It can be installed with glue or fixed into place using screws onto a variety of substrates. You won't find a tougher more durable stair tread. Australian Compliant and a popular choice for new buildings of all descriptions.

### Specifications:

**SKU: TAS7510**  
Length: Cut to size  
Size: 75mm x 10mm  
Insert Colour: Yellow or Black  
Australian Compliant - Manufactured to AS/NZS 1428.1

### Aluminium - Super Anti Slip 30mm Face

Rounded faced steps are no problem with the 30mm Super Anti Slip Aluminium Stair Nosing. Designed with awkward and tricky to fit edges in mind, this extrusion slides into place and creates a neat finish where others fail. Adaptable to numerous types of stairs and materials with low to medium traffic flow for both indoor and outdoor areas.

#### Specifications:

SKU: SAS7530

Length: Cut to size

Size: 75mm x 30mm

Insert Colour: Yellow or Black

Australian Compliant - Manufactured to AS/NZS 1428.1

### Aluminium - Super Anti Slip 10mm Bullnose

This stair nosing offers a solid aluminium extrusion with either Yellow or Black carborundum inserts for real grip and anti-slip. Able to be screwed or glued into position. Ideal for educational institutions, industrial applications, office areas, restaurants/eateries, shopping centres and sports facilities.

#### Specifications:

SKU: SAS7510

Length: Cut to size

Size: 75mm x 10mm

Insert Colour: Yellow or Black

Australian Compliant - Manufactured to AS/NZS 1428.1

### Aluminium - Black Anodized

All our stair nosings are available in a shiny black anodised aluminium option. This includes the Super Anti Slip 10mm or 30mm, Aluminium With Rubber Insert 10mm or 30mm and Tough Anti Slip.

#### Specifications:

SKU: SASBA7510, SASBA7530, TASBA7510, TASBA7530, TASBA7510

Length: Cut to size

Size: 75mm x 10 or 30mm

Insert Colour: Yellow, Black, Red or Grey

Australian Compliant - Manufactured to AS/NZS 1428.1

### Aluminium - Secur tread Corrugated

This corrugated stair nosing has a 10mm front and is recommended for general indoor and outdoor environments with medium to high traffic areas. These stair nosings glue down easily onto a variety of surfaces. Available in either Black or Natural aluminium.

#### Specifications:

SKU: STC10B - Black

SKU: STC10N - Natural

Length: Cut to size

Size: 55mm x 10mm (Aus Compliant)

Australian Compliant - Manufactured to AS/NZS 1428.1

### Aluminium - Flat 50mm

The Secur tread anodised aluminium corrugated stair tread is 50mm wide and is recommended for general indoor and outdoor environments with medium to high traffic areas. These stair treads are a surface mount system and glue down directly onto a variety of substrates.

#### Specifications:

SKU: STFLAT50B

Length: Cut to size

Size: 50mm x 3mm

Colour: Black

Australian Compliant - Manufactured to AS/NZS 1428.1

### FRP - Fibreglass Reinforced Plastic

Industrial fibreglass reinforced plastic stair nosing is hard wearing and suitable for high traffic areas including access stairs and platforms in marine, mining and factory environments. Due to its extremely hard grit surface it provides an aggressive non slip surface even in wet, oily, greasy or dusty environments. An impressive stair nosing!

#### Specifications:

SKU: FRPSN

Length: Cut to size

Size: 75mm x 10mm

75mm x 30mm

150mm x 30mm

230mm x 30mm

# WHEEL STOPS

## Ultimate Wheel Stop

Exclusive to Safety Xpress and manufactured from strong recycled rubber material, this wheelstop is robust, durable and tough to withstand our Australian conditions. Will not rot, crack or rust. Complies with Australian Standards AS2890.1:2004.

### Specifications:

**SKU: RUBWSULT**  
Material: High Strength Durable Rubber  
Height: 100mm  
Length: 1650mm  
Width: 150mm  
Fixings: 3 Fixings for concrete or asphalt inc  
2 Year Structural Warranty

## Ultimate Wheel Stop Disabled Blue

The matching accessory to disabled markings and signage in disabled bays and parking areas. Clearly indicates designated bays for permit parking. Part of the 'Ultimate' range, manufactured to high specifications and exclusive to Safety Xpress.

### Specifications:

**SKU: WSTOPDBL**  
Material: High Strength Durable Rubber  
Height: 100mm  
Length: 1650mm  
Width: 150mm  
Fixings: 3 Fixings for concrete or asphalt inc  
2 Year Structural Warranty

## Polyethylene Wheel Stop

Our polyethylene wheel stops are built to last. They are UV stabilised and therefore will not fade. Unlike concrete wheel stops our poly wheel stop will not crack over time. One of the most durable wheel stops on the market to suit all applications. Available in Safety Yellow, Disabled Blue and Grey.

### Specifications:

**SKU: WSPOL**  
Material: Polyethylene (LLDPE)  
Height: 100mm  
Length: 1650mm  
Width: 150mm  
Fixings: 3 Fixings for concrete or asphalt inc  
2 Year Structural Warranty

## Truck Wheel Stop

Our solid recycled plastic wheel stop is designed for truck parking in any situation including petrol stations, rest stops and truck stop parking bays. These wheel stops are also suitable for recreational vehicles and 4WD and caravan combinations.

### Specifications:

**SKU: WSTRUCK**  
Height: 150mm  
Length: 1250mm (2 together form 2.5m)  
Width: 150mm  
Fixings: 4 Included

## 900mm Rubber Wheel Stop

### Specifications:

**SKU: WSTOP900**  
Height: 100mm  
Length: 900mm  
Width: 150mm  
Fixings: 2 Included

## 500mm Wheel Stop

### Specifications:

**SKU: WSTOP500**  
Height: 100mm  
Length: 500mm  
Width: 150mm  
Fixings: 2 Included

## Wheel Stop Fixings

### Concrete Fixings:

**SKU: WSTOPFIX**  
M10 Screw 150mm  
M10 Washer  
14mm Nylon plug

### Asphalt Fixings:

**SKU: ROADSPIKE**  
300mm long corrugated road spike

# WHEEL STOP INSTALLATION GUIDE

1. Read all the instructions from beginning to end first.
  2. Determine exactly where the wheel stop will be placed. See our handy chart below for the Australian Standards (AS2890.1:2004)
  3. Put the wheel stop where it will go and using your hammer drill, drill a guide hole in the concrete through each hole in the wheel stop using the 14mm masonry drill bit. (This is to mark the surface so that you know where to continue to drill).
  4. Remove the wheel stop and brush or vacuum away the concrete dust.
  5. Continue to drill each guide hole to an approximate depth of 120mm.
  6. Brush or vacuum away the concrete dust.
  7. Put the plastic plug component of the fixing in the drilled hole and hammer in.
  8. Place the wheel stop over the holes, line up and place the supplied M10 screw through the wheel stop and into the plastic plug.
  9. Use your 17mm socket to tighten the M10 screw.
- For a seamless installation, ensure your wheel stops are placed on a flat surface.

Safety Xpress recommends you put the safety of yourself and others first when installing your wheel stops. Please be mindful of using and wearing the correct safety gear.

**Front into a low kerb**

# CONVEX MIRRORS

## Convex mirror - Indoor 450mm

Convex mirrors are commonly used for security and safety reasons to overcome sight restriction problems in visibility deficient areas. Suitable for retail applications. Visibility Coverage: Approx 5.5m

### Specifications:

**SKU: CONMIRID450**  
Diameter: 450mm  
Material: Polycarbonate face  
60mm Post mount bracket included  
Wall mount brackets sold separately

## Convex mirror - Indoor 600mm

The use of mirrors for safety is now widely accepted in pedestrian conflict areas. They assist people in seeing hazards and thus prevent collisions. Busy office areas benefit from clear visibility for safety and security. Visibility Coverage: Approx 7m

### Specifications:

**SKU: CONMIRID600**  
Diameter: 600mm  
Material: Polycarbonate face  
60mm Post mount bracket included  
Wall mount brackets sold separately

## Convex mirror - Indoor 800mm

Convex safety mirrors allow for up to 180 degrees of vision, and can be used to view at an angle to reduce accidents around blind corners and doorways. Effective when viewing aisle traffic in a storeroom or warehouse. Visibility Coverage: Approx 9.5m

### Specifications:

**SKU: CONMIRID800**  
Diameter: 800mm  
Material: Polycarbonate face  
60mm Post mount bracket included  
Wall mount brackets sold separately

## Convex mirror - Outdoor 450mm

The purpose of the convex safety mirror is to indicate to the road user, the presence or absence of a moving or stationary vehicle and/or pedestrian. The mounted visor keeps the mirror free from rain residue, dust and bird droppings. Visibility Coverage: Approx 5.5m

### Specifications:

**SKU: CONMIROD450**  
Diameter: 450mm  
Material: Polycarbonate face  
60mm Post mount bracket included  
Wall mount brackets sold separately

## Convex mirror - Outdoor 600mm

These mirrors are useful in factory areas where foot and forklift traffic can cross paths, in warehouses where blind intersections and corners exist and at service station locations where individuals need to view normally blocked access areas. Visibility Coverage: Approx 7m

### Specifications:

**SKU: CONMIROD600**  
Diameter: 600mm  
Material: Polycarbonate face  
60mm Post mount bracket included  
Wall mount brackets sold separately

## Convex mirror - Outdoor 800mm

Dust and road grime can significantly reduce a mirror's effectiveness, particularly if provided on or near unsealed roads. This mirror is fitted with a visor at its top to prevent the accumulation of dust on the mirror surface. Visibility Coverage: Approx 9.5m

### Specifications:

**SKU: CONMIROD800**  
Diameter: 800mm  
Material: Polycarbonate face  
60mm Post mount bracket included  
Wall mount brackets sold separately

### Convex mirror - Outdoor 1000mm

The larger the radius of curvature the lesser the distortion in a convex mirror. Road users more easily see larger diameter mirrors. These mirrors also provide a bigger field of view, enabling the oncoming traffic to be more easily seen.

Visibility Coverage: Approx 12m

#### Specifications:

**SKU: CONMIROD1000**

Diameter: 1000mm

Material: Polycarbonate face

60mm Post mount bracket included

Wall mount brackets sold separately

### Convex mirror - Indoor Security Black 450mm

When positioned appropriately, security mirrors alert personnel of danger or theft. Using mirrors to help provide a safe and secure work environment is good practice.

Visibility Coverage: Approx 5.5m

#### Specifications:

**SKU: CONMIRDB450**

Diameter: 450mm

Material: Polycarbonate face

60mm Post mount bracket included

Wall mount brackets sold separately

### Convex mirror - Indoor Security Black 600mm

Ideal for high security applications where surveillance and observation is of paramount importance.

Visibility Coverage: Approx 7m

#### Specifications:

**SKU: CONMIRDB600**

Diameter: 600mm

Material: Polycarbonate face

60mm Post mount bracket included

Wall mount brackets sold separately

### Convex Mirror Wall Mount Bracket

Convex mirrors can be mounted securely to a pole, wall or other high point to deter vandalism. Mirrors can be positioned at any angle and then secured in place.

#### Specifications:

**SKU: CONMIRWM**

Material: Galvanised Steel

### Full Dome Mirror - 660mm

Dome safety and security mirrors offer a panoramic view of an area. Typically for indoor use, dome mirrors help eliminate blind spots and increase visibility at a broader angle.

Visibility Coverage: Approx 37m2

#### Specifications:

**SKU: DOME660**

Diameter: 660mm

Material: Polycarbonate face

### Full Dome Mirror - 800mm

Dome mirrors are effective when used to view wide areas. A dome mirror lens is curved more than the convex mirror lens. The curvature allows for a wider angle of vision. Dome mirrors provide an infinite reflection.

Visibility Coverage: Approx 42m2

#### Specifications:

**SKU: DOME800**

Diameter: 800mm

Material: Polycarbonate face

# SPEED HUMPS & RAMPS

## Speed Hump - Rubber Compliant

Our 50mm high Australian Compliant Speed Hump will slow traffic and do the job. Bright Yellow and Real Black, our rubber speed humps are easily installed with all the necessary fixings supplied.

### Specifications:

**SKU: SHRUBCOM**  
Material: Rubber  
Height: 50mm  
Length: 250mm  
Depth: 360mm  
Fixings: 2 included per section

## Speed Hump - 50 Tonne

Our 50 Tonne speed hump is made from a high strength nylon plastic designed for durability which won't chip, rust or crack. 'Clip Together' design for easy bolt down D.I.Y. installation.

### Specifications:

**SKU: SHUMP50T**  
Material: Rubber  
Height: 40mm  
Length: 500mm  
Depth: 320mm  
Load Capacity: 50 tonne  
Fixings: 4 included per section

## Speed Hump - Ultimate 100 Tonne

Slow down speeding drivers especially where people and vehicles share the same space. Our "Ultimate" Heavy Duty Speed Hump will slow traffic and they look good too. Designed with our exclusive, unique 'honeycomb' configuration base for extra strength. The weight load capacity is a huge 100 tonne at a speed of 30km/h or less.

### Specifications:

**SKU: SPHUMP100**  
Material: U.V. stabilised composite plastic  
Height: 50mm  
Length: 250mm  
Depth: 350mm Load Capacity: 100 tonne  
Fixings: 2 included per section  
5 Year structural warranty

## Speed Hump - Steel

Heavy Duty Steel Speed Humps come in 1 metre modules and are installed alongside each other to form the speed hump length that you require.

### Specifications:

**SKU: SHSTEEL1M**  
Material: Hot dipped Galvanised steel  
Height: 55mm  
Length: 1000mm  
Depth: 360mm  
Fixings: 8 included per section

## Cable Protector - 5-Channel 30 Tonne

Used to secure cables and eliminate trip hazards for pedestrians accessing the area. Can be used in outdoor, indoor, on work sites, conference rooms, offices and more. Sections connect together to make up the protection length required.

### Specifications:

**SKU: CABPRO5PU**  
Material: Polyurethane  
5 Channels: 42mm High, 42mm Wide  
Length: 900mm  
Width: 500mm  
Height: 55mm  
Load Capacity: 30 tonne

## Cable Protector Large - 65mm 3-Channel 30 Tonne

Non slip design. Suitable for cables or pipes up to 65mm in diameter. Ideal for backstage situations where combinations of cables are required. Creates a surface that trolleys can be wheeled over safely.

### Specifications:

**SKU: CABPRO3PU**  
Material: Polyurethane  
3 Channels: 65mm High, 65mm Wide  
Length: 900mm  
Width: 500mm  
Height: 75mm  
Load Capacity: 30 tonne

### Roundabout - Modular

Available in Terracotta or Black and White, the Modular Roundabout is made from 100% recycled rubber and designed for quick and easy installation. The 1m sections link together to form a roundabout which is bolted directly into the road surface.

#### Specifications:

**SKU: MODROUND**

Length: 1000mm

Diameter: As required (6M has 40 segments)

Cost effective, minimal traffic disruption.

Half a day to install. Variety of infill options available.

### Speed Cushion

Made from G2 Recycled Rubber and White piano keys from EDPM Rubber. Features built in Cat's Eye reflectors and Dog & Bone linking system for easy installation.

#### Specifications:

**SKU: SPCUSH16, SPCUSH17, SPCUSH18 SPCUSH19, SPCUSH20**

Height: 75mm

Length: 2000mm (2mtrs) Can increase in

travel distance in 500mm increments

Width: Variable (Modular)

Gradient: Side edge 1:4

Gradient: Leading and trailing 1:8

Vic Roads Approved

### Rubber Kerb - Modular Traffic Island

Made from 100% recycled rubber, the Modular Rubber Kerb system is designed to suit most applications. Suits a variety of infill options proving to be a long lasting and cost-effective solution. Easily installed.

#### Specifications:

**SKU: RKERB51000**

Height: 75mm Lengths: 1000mm straight

**SKU: RKERB300**

Height: 75mm Radius: 300mm

**SKU: RKERB500**

Height: 75mm Radius: 500mm

### Trench Cover

Uncovered pits, trenches and manholes are dangerous and need to be covered up immediately with a Safety Xpress Safety Trench Cover to ensure a safe workspace, construction site or safe public access is maintained. Around construction sites, there are always trenches, pits, holes and other potential obstacles that should be covered. Designed primarily for use in street works, suitable for trenches or pits up to 700mm wide.

#### Specifications:

**SKU: TRENCH12080**

Length: 1200mm

Width: 800mm

Depth: 44mm

Load Limit: 500kg

### Kerb Ramp

Designed to make life easier when accessing areas over a concrete kerb such as hard to reach driveways. Can be used separately or joined together to form a longer ramp. Can be positioned freestanding and moved around as necessary. Fixings for installation included.

#### Specifications:

**SKU: KERBRAMP**

Height: 100mm

Width: 480mm

Depth: 420mm

2 x Fixings included

### Portable Kerb / Wheelchair Ramp

Made from lightweight moulded plastic and has a reinforced steel backing for extra support. It is designed for use on kerbs and steps. Ideal for wheelchairs and hand trolleys wanting to gain temporary access to elevated areas and suitable for any workplace, care facilities, public events, sporting carnivals and use around the home.

#### Specifications:

**SKU: WCRAMP**

Length: 700mm

Width: 1300mm

Height: 130mm

Load limit: 300kgs

# BARRIERS

## Expanding Barrier 3 metre Steel With Locking Wheels

This Expanding Barrier s-t-r-e-t-c-h-e-s to 3 metres! Just pull it out to your required length. The barrier is made from high quality steel and aluminium ensuring it is tough enough to stand up in any workplace environment. You can fix it to the surface or put a weight on the legs to hold it firmly in place. The design accommodates two or even three expanding barriers to fit together to form a 6 metre or 9 metre barrier if extra length is required.

### Specifications

**SKU:** EXPBAR3M

Length: 3 metres

Height: 980mm

Material: Steel and aluminium

Finish: Yellow and Black powder coat

## Expanding Barrier 3 metre Steel With Locking Wheels

The expanding barrier comes complete with locking castor wheels which makes it easy to move around or to pull in and out. It can be locked into place creating a temporary barrier to define areas. The side hooks attach to the next barrier creating a lengthy barrier. Perfect for large areas like warehouses and pedestrian areas.

### Specifications

**SKU:** EXPBAR3MW

Length: 3 metres

Height: 1000mm

Wheels: Castor locking wheels included

Material: Steel

## Foam Impact Protection Corner Strips

Designed to lessen the impact and to warn of protruding corners, edges and vulnerable pipes. Used to protect many other assets such as walls, vehicles, and machinery.

### Specifications:

**SKU:** IMPPROCORN

Material: Polyurethane Foam

Length: 1 metre

Width: 40mm

Opening width: 20mm x 20mm

## Wall Mounted Retractable Barrier - 9 metre

The Wall Mounted Retractable Belt Barrier, also referred to as crowd control barriers are designed to help alert visitors to hazardous areas that should not be entered. An extra long 9 metre belt ensures this unit can be used in almost any area, and the spring design maintains a taut belt no matter what length it is extended to within the 9m range. Wall mount receiver is included.

### Specifications:

**SKU:** WMBAR9YB

Belt Length: 9 metres Width: 50mm

Belt Colour: Yellow and Black or Red and White

Material: Unit - ABS Plastic Belt - Woven Nylon

## Cone-Top 9m Retractable Tape Barrier

The Cone Top 9m Barrier is an effective solution to quickly and effectively cordon off hazardous or restricted areas. It can be used by fitting to the top of a traffic cone or Skipper post. No need to waste barrier tape when you have one of these. This barrier can also be wall mounted using the Wall Mount Bracket. The barrier can be connected to another unit or to a wall using the Wall Mount Receiver.

### Specifications:

**SKU:** 9MCTRTAPY

Belt Length: 9 metres Width: 50mm

Colours: Yellow and Black or Red and White

Material: Unit - ABS Plastic Belt - Woven Nylon

## Chain Kerb / Low Barrier Blocks

Chain Kerb consists of 400mm Yellow and Black sections which link together to form a continuous edge or kerb. Ideal to use as a perimeter marker along chevron areas and it can be formed into almost any shape. When fixed on concrete, Chain Kerb is extremely strong and durable. It's UV stable and easy to work with because of its light weight structure.

### Specifications:

**SKU:** CHAINKERB

Length: 500mm

Width: 135mm

Height: 170mm

Material: UV stabilised durable plastic.

### Guardrail

An asset protection system suited for factories and warehouses to prevent damage to equipment and machinery from forklifts and trucks. Also used to protect staff along walkways and working zones. Easy to assemble and install, easy to modify. We can supply lengths, bullnose ends, posts with base plates and fixings to get your specific job done!

#### Specifications:

**Material:** Galvanised steel  
Various lengths and legs available, see website for options.

### Corner Protector

Rubber Corner Protectors are easily installed on car park walls, columns and building corners to prevent vehicles scraping when navigating tight car parks. Can be screwed and/or glued into place. Corner protectors are also suitable for use on machinery to cover sharp corners.

#### Specifications:

**SKU:** CRNPROTCT  
**Height:** 800mm  
**Width:** 90mm x 90mm  
**Material:** Rubber with yellow reflective panels

### Docking Bumper

Designed for loading docks to be attached to the facing wall to the reversing trucks to absorb impacts without causing damage to structures or vehicles. The damage avoiding barrier that will protect the infrastructure of the building.

#### Specifications:

**SKU:** DOCBUMP  
**Material:** Rubber  
**Length:** 900mm  
**Width:** 150mm  
**Height:** 150mm

### Steel Column Protectors

This heavy duty Column Protector is ideal for warehouses to guard columns from collisions caused by trucks and forklifts or in areas where there is movement around or near structural columns. These beauties could save you thousands and this heavy duty protector can take a serious knock. Available in 500mm, 750mm and 1000mm radius.

#### Specifications:

**SKU:** COLPRO500, COLPRO750, COLPRO1000  
**Height:** 450mm, 750mm or 1000mm  
**Material:** Galvanised Steel

### Column Protector

This lightweight column protector option provides strength and durability. Nylon velcro straps allow breakaway ability and easy installation. These protectors are rust proof and cold weather impact resistant in Safety Yellow. They suit round or square columns up to 250mm wide.

#### Specifications:

**SKU:** COLPRO900  
**Outer Diameter:** 610mm  
**Inner Diameter:** 250mm  
**Material:** Linear Low-density polyethylene (LLDPE)

### Racking Guard Protector

Stop impacts at the base of pallet racking. This guard is easily fixed to the floor through the four fixing points. Protect your racking, and therefore your stock, from accidental forklift or vehicle impacts.

#### Specifications:

**SKU:** RACKG15530  
**Depth:** 150mm  
**Width:** 155mm  
**Height:** 300mm  
**Material:** Powder coated steel  
**Colour:** Safety Yellow

# TEMP FENCING

## Crowd Control Barrier

The Crowd Control barrier is used to temporarily zone off areas at public events, work sites or in the work place. Easily installed by linking the panels together. Feet can be removed for simple transport and storage. The Crowd Control Barrier can be secured in place if required using a steel spike or a permanent fixing.

### Specifications:

**SKU: CROWD22**

Panel Size: 2200mm (L) x 1100mm (H)

Frame: 25mm O.D.

Infill Pickets: 20mm O.D. - 200mm spacings

Weight: 18.5kgs

Finish: Galvanised steel

Feet: Flat feet - removable

## Portable Plastic Fence Barrier

This barrier clips into a heavy 22kg solid rubber base so it won't fall over or blow away in windy conditions. It is a durable long lasting barrier designed for outdoor use. Can be easily stored by stacking on top of each other. This unit is ideal for sectioning off dangerous or hazardous areas. Single barriers can be linked together to form a variety of configurations.

### Specifications:

**SKU: PORTBAR110**

Material: High density polyethylene

Height: 1000mm

Length: 110mm

Base: 26kg heavy duty rubber material

Colour: Available in Yellow or Orange

## U-Bar Hand Rail

The U-bar Hand Rail is a "handy" addition to our range. It can be used in conjunction with our Safety Handrail, or it is perfectly capable of creating a barrier on its own. Can be installed at the entrance to a building or shopping centre to divert pedestrian traffic and provide them with stability or support to prevent slips or falls. The U-bar Hand Rail can also create a lengthy barrier within warehouse or industrial environments by being installed end to end.

### Specifications:

**SKU: UBD100SMG**

Material: Galvanised steel

Width: 1000mm Height: 1040mm

Mid Rail height: 550mm

## Orange Barrier Mesh 50m Roll

Re-useable orange barrier mesh fencing used to block off work zones and dangerous hazards. Can be attached to star pickets through the holes in the webbing. It is strong and durable, allowing the wind to blow through it, minimising blow overs. When you are finished with it, simply roll up and store out of the way for next time. Available in a 4kg or 8kg, 50 metre roll.

### Specifications:

**SKU: BARMESH50-4KG, BARMESH50-8KG**

Material: Orange LDPE plastic

Length: 50 metre roll

Height: 1 metre

## Star Picket 1650mm Pack of 10

Safety Xpress star pickets/star posts are black tar dipped with pre drilled holes for fixing Wire, Temporary Fence, Barrier Mesh or Bunting. Strong and long lasting, these pickets are a worthy investment and will be re-used time and time again.

### Specifications:

**SKU: STARPICK1650**

Star Picket Size: 1650mm

Finish: Black Tar Dipped

Holes: 14 holes per picket

Pack Size: 10 pickets

## Star Picket Caps Box of 50

Maintain workplace safety by fitting Safety Xpress Star Picket Caps to your fence posts, reo bars and star pickets. Supplied in Safety Yellow for optimal visibility.

Supplied in a box of 50

### Specifications:

**SKU: STARPICAP**

Material: UV stabilised Yellow polyethylene

### Plastic Safety Chain 6mm - 25m Roll

Our huge 25 metre roll of UV Stabilised Yellow Plastic Safety Chain is used to zone off areas using T-Top Bollards, Hoop Bollards or Fixed Bollards with chain rings installed. It's even useful to have around to fix between pallet racking posts to stop access to aisles in warehouses. A very handy roll indeed!

#### Specifications:

**SKU: PLCHA825**

Chain Thickness: 8mm  
Chain Length: 25 metres  
Colour: Yellow

### Bunting Orange Safety Flag 30m Roll

The Safety Xpress Hi Vis Orange Barricade Bunting Flags are ideal for use with T-Top Bollards to temporarily zone off work zones and potential hazards. Also useful to draw attention to places such as car yards, markets and outdoor areas.

#### Specifications:

**SKU: BUNTDAY30**

Material: Nylon rope with UV Stabilised High Vis orange flags  
Length: 30m roll  
Flag size: 180mm x 230mm x 230mm

### Barrier Tape Red & White 50M Roll

Red and White Barrier Tape can be used to temporarily barricade off work zones or dangerous areas from pedestrian traffic, blocking access to a pathway. Easily unrolled, unsafe areas can be cornered off in a prompt, no fuss manner. Recommended to be used in conjunction with our T-Top Bollards or our Hoop Top Bollards.

#### Specifications:

**SKU: BARTAPERW50**

Length: 50 metres  
Width: 75mm

## SAFETY RAIL

### Modular Safety Rail Yellow

Here's a fence which comes together like meccano. Easy to join, adjust and fix to floors, our Safety Rail Fence is top of the class when it comes to Safety Fence. Supplied in sections, this allows you to run lengths where required to keep people and vehicles separate. The upright posts allow the rail to be connected with ease, just an Allen key required. Tighten the grub screws and you're done. Brackets, joiners and fixings complete the fence.

#### Specifications:

Diameter: 40nb  
Material: Galvanised steel powdercoated Safety Yellow

### Modular Safety Rail Galvanised

Easily installed due to its modular design. This safety rail can be disassembled at a later stage and reinstalled in alternative configurations as your workplace grows or workflow changes. With a wide range of fittings available, this railing system can adapt to almost any situation.

#### Specifications:

Diameter: 40nb  
Material: Galvanised steel

### Ball Fence

The Ball Fence can be installed to extend existing or damaged safety railing. Consisting of a top (hand) rail and a bottom (knee) rail the ball fence will suit most applications. Posts are available for either below ground or surface mount installation. Our Ball Fence is made of galvanised steel and can be installed to extend existing safety rail or to replace sections of damaged railing.

#### Specifications:

Height: 1017mm ground to centre of handrail  
Post - 48.3mm OD (40mm nb)  
Handrail - 42.4mm OD (32mm nb)  
Kneerail - 33.7mm OD (25mm nb)  
Material: Galvanised steel

# SIGNS AND FITTINGS

## Traffic Signs

Safety Xpress can supply a variety of traffic signage for car parks, workplaces and roadways. Custom signs are also available in metal and corrugate to suit your needs or are manufactured to VicRoads Requirements.

## Safety Signs

Safety in the workplace is supported by the use of proper signage which warns against potential hazards and instructs or directs vehicles to maintain a safe environment. We have a variety of PPE signage for workplaces and roadways. Custom signage is also available if you require a sign that is outside of our standard range.

## Sign Posts / Caps

Galvanised posts perfect for mounting most traffic signs or convex mirrors are available in different lengths. The galvanised cap clips on the top of the post to give a finished look and to stop the post filling with debris and water.

### Specifications:

**SKU: SIGNPGAL28**  
Diameter: 60mm  
Length: 2.8 metres

**SKU: SIGNPGAL32**  
Diameter: 60mm  
Length: 3.2 metres

**SKU: SIGNPCAP**  
Diameter: 60mm

## Signpost Sleeves

### Surface Mounted Sleeve

**SKU: SIGNSLSM**

Fix a Gal Post (50nb) to concrete instead of core drilling. The base plate has 4 fixing holes pre drilled for bolting into the surface. The sleeve has a slot for the key wedge which keeps the post nice and straight.

### In Ground Sleeve (Wizard) 450mm

**SKU: IGWIZ450**

Manufactured from steel and then galvanised. It has 4 blades below the ground to stop the post (50nb) from twisting. You'll need a sledge hammer to knock the Wizard into the ground. It comes with a key wedge which slides down the gap to keep the post in place.

## Sign Bracket

You will need these aluminium brackets for fixing standard signs to Gal posts. Usually 2 brackets will be required for each sign on the post. They have a tightening screw which keeps the sign firm and straight on the post.

### Specifications:

**Single Bracket**

**SKU: TD1**

Suits standard 50mm nb posts

**Double Bracket**

**SKU: TD2**

Suits standard 50mm nb posts

## Height Clearance Bar

Height Clearance Bar with hangers. Designed to protect the structural integrity of undercover parking areas and the like by providing a warning for vehicles who try to enter who are over-sized. These clearance bars are designed to move with the force of the vehicle. Custom clearance height stickers also included. Please specify the clearance height that is required on the height bar. Available in 2m, 3m, and 4m lengths. Fitted with chain rings ready to hang.

### Specifications:

**SKU: HCBAR2M, HCBAR3M, HCBAR4M**

Material: Galvanised Steel, powder coated Safety Yellow  
Length: 2 metres, 3 metres, 4 metres  
Clearance height stickers included

# SAFETY CONES

## Traffic Cone - 450mm

Made from durable UV stabilised premium quality PVC material. The 450mm Traffic Cone is used in the workplace or low speed rural roads to indicate working zones and dangerous hazards.

### Specifications:

**SKU: CONE450R**

Height: 450mm

Material: PVC

Reflective Band: Class 1 reflective band

150mm high for night time visibility.

Complies with AS/NZS 1906.1:2007

## Traffic Cone - 710mm

This high quality 710mm Traffic Cone is suitable for use on highways. Fit with a 250mm white reflective band this cone can be used at night time.

### Specifications:

**SKU: CONE710R**

Height: 710mm

Material: PVC

Reflective Band: Class 1 reflective band

250mm high for night time visibility.

Complies with AS/NZS 1906.1:2007

## Traffic Cone - 1m

Towering above the other cones, this Safety Cone is 1000mm high. Used in conjunction with the Cone Top 9m Retractable Tape Barrier or cone bar to zone off dangerous areas.

The 1m High Safety Cone with white reflective sleeve and heavy duty 6kg base will resist blowing over and accidental knocks. The extra height allows for maximum visibility.

### Specifications:

**SKU: CONE1M**

Height: 1000mm

Material: Polyethylene, High-Vis orange

Reflective Band: 250mm high

## Caution Wet Floor 4 Sided Cone / Blank Yellow

Highly visible, bright Yellow, four sided hazard protection safety cone with "CAUTION WET FLOOR" wording and symbol displayed on all four sides. Used to warn against wet floor hazards. Optional 6kg Rubber Base available to reduce movement and prevent the cone from being knocked over easily or blowing over when used in outdoor conditions. Also available blank without caution warnings.

### Specifications:

**SKU: 4SYCONEWF**

Model: Caution Wet Floor 4 sided cone

Material: Tough Plastic

Height: 890mm high

Optional Rubber Base: 6kg

## Retractable Cone Bar 1.3M - 2.5M

The Retractable Cone Bar is made of durable ABS plastic with alternating Black and Yellow stripes. It is designed to extend and retract to join traffic cones together to form a physical barrier used to temporarily block off work zones or hazardous areas. Suitable for use with any of our Traffic or Safety Cones.

### Specifications:

**SKU: CONEBAR25**

Colour: Black and Yellow for visibility

Length: 1.3m to 2.5m

## Reflective Tape Class 1

Class 1 Red Reflective Tape is commonly applied to structures that are potentially hazardous at night time.

Suitable for indoor or outdoor use. It will last up to 10 years in outdoor environments. This tape is up to 3 times brighter than class 2 tapes.

### Specifications:

**SKU: REFTC1RED45**

Length: 45.7 metre roll

Width: 38mm

Colour: Red

Rating: Class 1

# LINE MARKING SUPPLIES

## Line Marking Paint

It's what the line markers use. We don't mind sharing this little secret with you as it's good to know this paint is the best available. It doesn't get any better than that as a recommendation so if you have a job which you could spray, roll or brush on, use this paint. Suitable for concrete or asphalt surfaces. 15 litre tins.

### Specifications:

SKU: LMPRC15L

Available in Black, Yellow, Red, White, Grey.

## Line Marking Stencils

Keep a uniform look, minimise paint bleed and the likelihood of errors by using number and letter stencils. Reuseable a number of times these stencils are an investment in your work. Easily cleaned and flexible enough that dry paint residue will peel off.

Disabled parking stencil meets Australian Standards.

### Specifications:

SKU: STENALPHSET300

A-Z - 300mm

SKU: STENUMSET300

0-9 - 300mm

SKU: STENDIS

Disabled Parking Stencil

## Eurocell Masking Tape

The Eurocell 50mm wide masking tape is the preferred option by linemarkers.

### Specifications:

SKU: MASKTCAR24

Carton: 24 Rolls

Length: 50m

Width: 50mm

SKU: MASKTAPE

Single roll

## Line Marking Tape

Used to mark out designated areas within the workplace, factories and warehouses as an alternative to using permanent line marking. Can also be used for marking out areas to be spray painted.

### Specifications:

SKU: LMTAPE4833

Length: 33m

Width: 48mm

## Car Park Marking Dots

Car Park Marking Dots for highlighting carpark spaces on gravel, asphalt or grass surfaces.

### Specifications:

SKU: MDOT

Material: Plastic

Diameter: 100mm

Fixing: Comes with fixing peg 125mm long

Colour: Yellow or White

## Raised Pavement Markers 2 Way RRPMS

2 Way Reflective Raised Pavement Marker (RRPM) used to clearly define traffic lanes at night and by day. Other applications include colour-coding of:

Entrances - acceleration lanes

Exits - deceleration lanes

Service - low speed lanes

Main travel - high speed lanes

Wall mounted bridge and tunnel marking

Construction zones

### Specifications:

SKU: RRP2WAY

Size: 100mm x 75mm

Colours: Yellow, White, Blue, Red, Green

# GRACO INDUSTRIAL SUPPLIES

## Graco LineLazer 3400

The LineLazer 3400 is the proven performer for your restriping jobs. As the preferred choice for 1-gun professional performance, the LineLazer 3400 is perfect for small parking lots, seal coating contractors, schools and park and recreation departments.

### Specifications:

**SKU: GRA3400**

Fuel: LPG

Dry Weight: 72.5 kg  
Max Pressure: 3300psi  
Max Flow: 2.8 l/min  
Engine: 4HP Honda  
Paint Capacity: 20 litres standard, 57 litres optional

## Graco LineLazer 3900

This machine comes complete with two quick release spray guns, one with a longer hose for stencil work, three wheel trolley with lock-in jockey wheel, and digital display with information storage. Designed to deliver the most precise and consistent lines in the industry, it is the perfect choice for medium to large car parks and even big shopping centres.

### Specifications:

**SKU: GRA3900**

Fuel: LPG  
Dry Weight: 104kg  
Max Pressure: 3300psi  
Max Flow: 4.7 l/min  
Engine: 4HP Honda  
Paint Capacity: 20 litres standard, 57 litres optional

## ThermoLazer 200TC

Striping contractors can now achieve more production with a safer, more affordable, and easier to use thermoplastic system. Graco changed the world of thermoplastic striping with the ThermoLazer Striping System, and they've done it again with the new ThermoLazer 200TC. The premiere solution for smaller thermoplastic striping jobs.

### Specifications:

**SKU: GRA200TC**

Fuel: LPG, Material Capacity: 90 kg  
Dimensions L 112cm, 99cm H, 84cm W  
Bead Hopper Capacity: 18 kg  
Dry Weight: 119 kg  
Melt Time for 136kg (300 lb) Thermoplastic  
Material: 4.5 Hours without the PreMelt System

## Graco Grindlazer 270

Graco GrindLazer 270 is a medium duty scarifier ideal for removing parking bay lines. Comes with EasyGlide wheel mount system and 8inch 8 point flail cutters for everyday line removal from traffic paint to thermoplastics.

### Specifications:

**SKU: GRAGRIN270**

Max Cut Width: 8inch (20cm)  
Cut Direction: Forward  
Removal Rate: 600 sq foot / 1300 sq foot per hour  
Engine: 9.0HP Honda  
Dry Weight: 136 kg

## Graco 190 PC Express Electric Airless Paint Sprayer

Graco's 190 PC Express electric airless sprayer is an ideal choice for the beginning painting professional. Its compact, light-weight design weighs less than 14 kg, and it's built tough to handle everyday use in small interior and exterior paint projects, repainting and new construction. Recommended materials: Latex, Acrylics, Enamels, Lacquers and Varnishes.

### Specifications:

**SKU: GRAP5190**

Max PSI (BAR): 3000 (207)  
Motor: 5/8 hp DC 240V

## Graco G-Force II 2532 DD Pressure Washer

The G-Force II 2532 DD is a great choice for light duty applications. It's light, compact, and ideal when you need consistent reliability for the occasional cleaning job. High-pressure Gun and Wand. 4 Quick-Connect Spray Tips (0°, 15°, 25°, Chemical), Chemical Injector Kit 50 ft / 15 m Non-marking Hose 50 Mesh Inlet Filter

### Specifications:

**SKU: GRAPW2532**

Maximum Working Pressure: 3200 psi  
Honda Engine Size: GX200  
Hose: 3/8 in x 50 ft (4000 psi)

# MATS

## Anti-Slip Industrial Mat

Industrial grade, multi-purpose wet area non-slip mat. Durable natural rubber mat with large drain holes. Provides a safe environment in moderately wet areas. Can be used in wet or wash areas to help prevent slipping accidents. Approx 13mm thick.

### Specifications:

SKU: 825IND6090 – 600mm x 900mm  
SKU: 825IND9015 – 900mm x 1.5m

## Anti-Fatigue Diamond Plate Sponge Mat

Extremely suitable to areas exposed to wear and tear. Good relief of leg, ankle and back discomfort while working. Durable PVC surface - bonded to a resilient anti-fatigue closed cell vinyl foam base. Diamond pattern provides an abrasion and slip resistant surface. Top surface will resist common fluids, most chemicals and is non-flammable. Available in solid Black or with Yellow/Black chevron borders. Bevelled edges on all sides.

### Specifications:

SKU: 416DPS6090 – 600mm x 900mm  
SKU: 416DPS9015 – 900mm x 1.5m

## Anti-Fatigue Ergo Stance

The Ergo Stance Anti-Fatigue mat is commonly used within work places in areas in which staff are conducting tasks on their feet for long periods of time. A moulded rubber mat with a flexible domed top surface. Specifically designed to massage the feet and provide anti-fatigue support when working in a stationary position for extended periods of time. Provides comfort and relief for leg and back fatigue.

### Specifications:

SKU: ERGSTA60X90 – 600mm x 900mm  
SKU: ERGSTA90X12 – 900mm x 1.2m  
SKU: ERGSTA90 – 900mm x per metre

## Polyrib Entrance Mat

Made from durable polypropylene fibre with a vinyl back and borders. Effectively removes dirt and moisture from footwear.

### Specifications:

SKU: 500PB6090 – 900mm x 600mm  
SKU: 500PB69015 – 900mm x 1.5

## Entrymaster Classic Mat

Durable polypropylene will not fade, rot or stain and also dries quickly. Ideal for doorway areas. The raised pattern will not flatten. Excellent dirt and water retention. The cleated back minimises movement on most surfaces especially carpet. Easily cleaned by sweeping, vacuuming or hosing. Anti-static and safe for using in sensitive areas 1.2KV. Passes flammability standards DOCF1-70.

### Specifications:

SKU: 200ENT12LM – 1.2m per lineal metre  
SKU: 200ENT6090 – 600mm x 900mm  
SKU: 200ENT1824 – 1.8m x 2.4m  
SKU: 200ENT9015 – 900mm x 1.5m

## You Beaute Ute Mat

Order by the metre to protect your cargo and the deck of your valuable ute with the You Beaute Ute Mat. Made using a premium quality, 100% natural rubber our ute mats are non-porous, non-slip, easy to clean rubber. It has holes to allow moisture to evaporate to save your tray from rusting out. Have a custom size? The You Beaute Ute Mat can be easily cut to size or shape with a knife. Can also be used for Boats, Work Shops or Home Gyms.

### Specifications:

SKU: UTEMATH  
Length: 100cm  
Thickness: 10mm  
Width: 183cm  
Matting available in up to 10m lengths

# CAR PARK STORAGE

## OVER BONNET STORAGE LOCKER

Wow look at this for size. This is a massive Storage Locker which will fit over the bonnet of your car in your parking space. Used extensively in high-rise apartment buildings where storage is a premium, this is the solution. Solid powder coated steel construction with durable slow lift struts, this unit is lockable too. Height adjustable legs are included which are handy if you have a 4WD or higher vehicle to raise the clearance from the standard height of 1100mm to 1400mm. The Safety Xpress Over Bonnet Storage Locker provides a huge 2.5 cubic metres of additional storage space perfect for storing items such as golf clubs, beach/outdoor gear.

### Specifications:

SKU: OBSL24

Dimensions: 2.5m Wide x 1m Deep x 1m High (Total Height 2.1m - 2.4m)

Clearance: 1.1m - 1.4m with adjustable legs (ground to bottom of unit over car)

Load Capacity: 300kgs

Material: Steel with Shale Grey powder coat finish

### FEATURES

- Long life solid steel construction
- Holds up to 300kgs
- 11 level adjustable gas strut door
- Adjustable legs to suit almost any vehicle bonnet height
- Easily assembled by 1 to 2 people
- Unique key 3 point locking system (2 keys supplied)
- Galvanised steel and powder coat finish
- Minimal bolts and screws for fast assembly
- Sits freestanding on your carpark floor
- 10 year limited warranty
