

The Ultimate Speed Hump

The Ultimate speed humps are made from a high quality blended plastic. For easy installation each section comes in 250mm lengths with a cable channel at the bottom. Due to the honeycomb construction the Ultimate Hump can withstand a massive 100 tonnes. It is well suited to high traffic areas with heavy vehicles. Cleverly designed with built in reflectors the Ultimate speed hump is great for car parks where vehicles occupy it day and night. Compared with rubber and steel, the Ultimate speed hump is the most durable and long lasting option in our range. This product complies with Australian Standards, is UV Stabilised and has a 5 year warranty.

Intended Use:

Due to its hard wearing nature it is ideal for areas such as industrial factories and car parks, schools, shopping centres etc anywhere with high volumes of traffic that are occupied around the clock.

Specifications:
