Size	300mm x 300mm
Slip Rating	P5
Material:	High grade UV stabilised Polyurethane
Compliance	AS/NZS 1428.4.1:2009
Warranty	10 Year Limited Warranty

Description:

The SafetyXpress 'Peel & Stick' Tactiles reduces the installation time of otherwise time consuming installation process.

Made from High grade UV stabilised Polyurethane, these directional bars on top give users a better guide of travel and provide added safety, and warn approaching hazard such as near bus stops or on-coming traffic.

Installation:

Measure the size and area you need to apply these Peel & Stick Tactiles. Work out how many pieces you need exactly first.

Make sure the surface is clean from debris oil or dirt prior to installation. Alternatively you can use acetone to clean and prepare surface first.

Simply **Peel and Stick!**

Note: Tactile Indicators require a 30% luminance contrast with its surrounding substrate to achieve compliance with AS14528.1
